

# Summer Program

## Thailand Community Based Health System

### Program Objective:

Provide international students with a two-week immersive experience in Thailand's community-based health system.

### Learning Focus:

Gain insights into the Thai health system, emphasizing lessons learned in primary healthcare and universal health coverage.

### Scope of Knowledge:

Explore the intricacies of the Thai health system, covering aspects from the national level down to grassroots initiatives.

### Hands-On Experience:

Engage in a community assessment to identify and understand community health needs.

Remarks: Meals are included.
